Percentage of Working-Age Adults	25%	24%
Total Number of Elderly Facing LEP	587	5,279
Percentage of Elderly Facing LEP	43%	23%
Income		
Median Household Income	\$65,361	\$37,862
Median Family Income	\$73,066	\$41,639
Per Capita Income	\$22,544	\$19,410
Poverty		
Number of Overall Individuals Living in Poverty	807	44,075
Percentage of Overall Population Living in Poverty	5%	19%
Number of Children (17 and Younger) Living in Poverty	198	16,015
Percentage of Children Living in Poverty	5%	27%
Number of Elderly (65 and Older) Living in Poverty	154	3,872
Percentage of Elderly Living in Poverty	11%	17%
Housing		
Number of Homeowners	2,421	24,965
Home-Ownership Rate	47%	28%

¹ Based on Filipino Alone or In-Combination Numbers

Technical Note

Race Categories

The 2000 census was the first decennial census in which respondents were allowed to mark more than one race. As a consequence, Census 2000 race information is far more complicated than such data from previous censuses. For example, 2000 data include results for single-race as well as multiple-race responses. “Alone” corresponds to the respondents who reported exactly one race group and no other race category. “Alone” should be considered the minimum population size in any analysis that uses Census 2000 data. To be as inclusive as possible, this table uses “Alone or in Any Combination” numbers.

“Alone or in Any Combination” corresponds to the responses (not respondents) that included the selected group, either alone or in any combination with other Asian groups or other race categories. If a respondent selected an Asian group and another racial group (*e.g.*, Filipino and black), that individual, while excluded from the “Asian Alone” count, was tallied in the “Alone or in Any Combination” count for the Asian group and the other racial group. Hence, some overlap in the “In Combination” numbers occurred. “Alone or in Any Combination” should be considered the maximum population size in any analysis that uses Census 2000 data.

About This Table

This table is part of a series of Asian American population profiles prepared by the Asian American Federation of New York Census Information Center (CIC) to increase understanding of the rapidly growing and diverse Asian American population in the New York metropolitan area.

The Asian American Federation of New York, a nonprofit leadership organization that works collaboratively to meet the critical needs of Asian Americans in the New York metropolitan area, was selected by the U.S. Census Bureau to operate the only CIC in the New York area focused on serving the Asian American community. Established in 2000, the center provides census information, conducts data and policy analysis, and encourages census participation. For more information on the Federation, visit www.aafny.org.

Data citations from this table should include the following acknowledgment: “Data derived from analysis by the Asian American Federation Census Information Center.”
